How do I perform a factory reset on Tofino Xenon?

- 2018-02-15 - Tofino

Tools Required

1. Small screwdriver or ballpoint pen - to press the recessed button on the front panel of the Xenon device.

Procedure

1. Press the recessed "Save/Load/Reset" button 3 times. The "Reset" indicator on the Xenon should be Yellow when this is done.
2. After a few seconds, the "Mode", "Save/Load", "Reset" and "Fault" indicators will all flash together while the reset is performed. A "click" sound may also be heard from the Xenon's internal relay.
